Warrants are for Investors with a high level of risk tolerance. They offer the opportunity to participate disproportionately in the performance of the underlying asset of your choice with a relatively low capital commitment. Depending on the product structure, Investors can benefit from rising (Call Warrant) or falling (Put Warrant) markets. The risk of loss is limited to the invested capital. The price of a Warrant can be influenced by several factors besides the movements in the price of the underlying, in particular: time to expiration, implied volatility, risk-free interest rate and expected dividends.

Goodwill Provision

In case the Warrants were in the money at 12:00h local time Zurich on the Expiration Date and the investor missed the exercise deadline, the Issuer offers investors on a voluntary basis, without recognition of a legal obligation to do so, the possibility of a goodwill payment in cash. To receive such goodwill payment, investors have to contact the Issuer no later than 18:00h local time Zurich on the Business Day following the Expiry. Thereafter, no goodwill payment will be made.

The goodwill payment amount will be determined by the Calculation Agent and is defined as:

$\text{Min}(\text{Underlying price at 12:00h local time Zurich on Expiration Date, Settlement Price}) - \text{Strike}$, adjusted for the Conversion Ratio and converted into the Redemption Currency, if applicable.

For the avoidance of doubt, if either the Underlying price at 12:00h local time Zurich on the Expiration Date or the Settlement Price are equal or below the Strike, no payment will be made.
